INTRODUCTORY NOTE

These Economic Statistics, along with the Economic Performance and Prospects paper in the 1989 Manitoba Budget, provide summary annual information on the Manitoba economy. Most data are for the latest five-year period. Comparisons of economic performance with other jurisdictions are for the latest five years or a more recent period.

In the following tables, annual average growth is calculated by distributing the aggregate amount of growth during the period on the basis of a constant annual rate of growth compounded annually.

Manitoba Economic Statistics
